

① – PLUG INSTALLED HAND TIGHT FROM FACTORY. IF PORT IS NOT UTILIZED, TIGHTEN BEFORE USE.

Technical drawing of the front view of a circular mechanical component. The drawing shows a central circular feature with concentric rings. A dimension line at the top indicates an outer diameter of $\varnothing 2.875$ [73]. A dimension line across the top of the central feature indicates a width of $2X\ 1.260$ [32] ACROSS FLATS. A dimension line on the left indicates a $3X\ 120^\circ$ arc. The drawing includes a central crosshair and a small rectangular feature at the top center.

OPERATING DATA		
MEDIA	WATER/HOT OIL	
MAX WATER PRESSURE	100 PSI	7 bar
MAX WATER TEMP.	320°F	160°C
MAX SPEED	1500 RPM	1500/min
